

## HORTECH SLIDE T for baby leaf, ruccola

SLIDE T is a machine pulled by the tractor for the harvest of baby leaf. With SLIDE T you can put the product direct into the boxes on the field. The cutting height is controlled by a mechanic roller and a panel control with level indicator, that assures a perfect control. It is equipped with: a belt mounted on a stainless steel frame, a parallelogram system made of two independent frames, a blade turning on self – centering pulleys covered by rubber, boxes supports, a fold-up footboard on the back. The track and the lights are adjustable.

accessories: •Belt harvesting system to bunch products like parsley
