

SFOGGIA SIGMA 5

SIGMA 5 is a pneumatic single seed precision seeder for seeding on semi no tilled soils. With solid quality construction, combining simplicity, versatility and reliability in seeding even at speeds of up to 10 / 12 km/h. The double disc wheel traction assures a constant depth seeding even in extremely difficult conditions.

SIGMA 5 is available in different versions: fixed frame, telescopic frame of 3,20 or 2,55 mt. with a inner-line maximum of 74 cm and also a folding hydraulic frame.

Seeding of corn, soy, beet, sunflower, sesame, bean, pees, cotton, peanut, vegetables, and others upon requests.

Seeding element with depth regulating discs; seed drop at 35 cm. from soil; special profile seed selector; mechanical seed break; 42 positions for seeding distances; self lubricating bushings at all points of oscillation of the parallelogram and element of the seeder body; self lubricating sealed bearings mounted on all points of rotation; complete discharge of seeds; minimum inner-line of 38 cm; volumetric fertilizer spreader mounted on a 220 lt Pvc hopper, also available on a steel or stainless steel hopper of 800 / 1000 lt.; granulate volumetric hopper 10/20 lt in Pvc; volumetric distributors of fertilizers and pesticides in row or broadcast distribution.
